

## **Purchase Incentive Rental Agreement Reporting Form**

A new law (formerly HB 487, sponsored by Representative Walt McNutt) changes the definition of exempt business inventory to include certain farm machinery and construction equipment that is held pursuant to a purchase incentive rental program. It's effective for the 2009 tax year.

Quarter ending date	December 31	January 15				

Equipment Description	Year New	Make/Model	County/Location of equipment	Rental begin date	Rental end date	Renter

To qualify for this exemption, the farm implement or construction equipment must be:

- ✓ owned by a farm implement or construction equipment dealership,
- ✓ held for sale, and
- ✓ rented to a single user of the farm implement or construction equipment as an incentive for the purchase of the property.

A farm implement or item of construction equipment that is brought into the state under a purchase incentive rental program and meets the qualifications becomes taxable only if it is sold or otherwise disposed of in Montana.

A farm implement or item of construction equipment does not qualify for this exemption if:

- ✓ it is rented to a person for more than 9 months,
- ✓ it is rented more than once to the same person, or
- $\checkmark$  it is not owned by a farm implement or construction equipment dealership.

The status of personal property on January 1 (whether taxable or exempt) is the status for the entire year.

Additional forms are available at your local Department of Revenue office or online at http://revenue.mt.gov.

As part of its audit responsibility, the department may occasionally request a copy of specific purchase rental program agreements from dealers.
